ABOUT ME

Nazia

Motivated Software Engineering student currently in the fourth semester at the American University of Afghanistan, with strong experience in education, language instruction, and digital skills training.

I have several years of professional experience teaching English, interpreting, and training students in both academic and technical subjects. My work includes classroom teaching, online instruction, coding education, and computer literacy training.

In addition to my teaching experience, I am actively developing my technical background in programming, particularly in Java, Python, and front-end web development. I am passionate about education, technology, and empowering students with practical skills that support their academic and professional growth. My strengths include communication, adaptability, leadership in educational environments, and the ability to combine technology with effective teaching methods.
